BIG NAVAL BUDGET.

Secretary Long's Estimate For Next Year.

THREE MORE NEW BATTLESHIPS.

Three Armered Cruisers, Three Secand Class Cruisers and Six Third Class Craisers-Enlistment of 20,000 Men Advised.

WASHINGTON, Nov. 19.—In his forthcoming annual report Secretary Long will recommend that congress during its coming session authorize a large increase of ships and men for the naval establishment. He has determined to incorporate in it the recommendations of the board on construction as to the number of ships.

The secretary feels congress will more easily appreciate the requirements of the navy with the recommendations of a board of capable officers at hand and will be disposed to make the necessary authorization of the types proposed by such officers. It is understood he will point out that the acquisition of foreign territory by this government makes it essential for its safety, as well as for the protection of the United States, that the navy should be largely increased.

His recommendations will therefore include the authorization of the construction of this number and classes of

displacement. Three second class cruisers of 6,000 tons displacement.

Six third class cruisers of 3,000 tons The secretary will also recommend

that authority be given to the department to enlist 20,000 men and 2,500 boys. It will not be necessary to keep the navy up to its full strength, but only sc many men as may actually be required

Orders were issued to the department yesterday formally assigning Captain P. H. Cooper to command the cruiser Chicago, which will be placed in commission at the Brooklyn navy yard about Dec. 1. Captain Cooper and other officers of the Chicago have been on the receiving ship Vermont at the Brooklyn navy yard awaiting the completion of the repairs to their vessel. It is expected that the Chicago will be assigned to the European station.

Orders will be issued within the next Rear Admiral J. N. Miller. Rear Admiral Miller will reach the age of retirement on Nov. 22. His retirement will make Rear Admiral Bunce the senior officer of the pavy, and the retirement | Libeled For Debt, She Evaded the of the latter officer on Dec. 25 will make Rear Admiral Dewey the head of the service, which position he will hold until December, 1899, when he reaches the

Should congress amend the law so as to permit Rear Admiral Dewey to remain on the active list for ten years, as was done in the case of officers of the civil war who received the thanks of Ongress, he will not retire before 1909. a sprinkling of foreign built warships. Admiral Dewey has informed the navy department that he has contracted with a Hongkong firm of wreckers to raise three of the Spanish war vessels sunk in the battle of Manila last May day. The cost of raising the ships and putting them in thorough repair will be \$500,000. The vessels to be raised are gunboats of large type, and in the opinion of Chief Constructor Hichborn they will be the very best kind of craft for the protection of the United States interests among the Philippines and along the Asiatic coast. They are the sister ships Isia de Cuba and Isla de Luzon and the Don Juan de Austria.

The first two are vessels of 1.040 tons. 200 feet long, 30 feet beam by 11 feet 6 inches draft. They are of steel, with twin screws, good protective decks and an effective battery composed of six 4.7 Hontoria guns, four 6 pounders, two 1 pounder Nordenfeldts and two 5.3 Nordenfeldts and three torpedo tubes. The speed is placed at 15.8 knots under forced draft. The Austria is a little larger. her tonnage being 1.152, her length 210 feet, 32 feet beam and 12.6 feet draft. She was built at Cartagena in 1887. The other two vessels were built by Sir William Armstrong at Elswick in 1886. The Austria's armament is four 4.7 inch Hontoria guns, four 6 pounders, one machine gun and two torpedo tubes.

The work of raising the three Spanish vessels in Manila bay is to be conducted under the supervision of Naval Constructor Capps.

The Kaiser's Movements.

BERLIN, Nov. 19.-The news that Emperor William is to return home by a roundabout route without touching at Vienna or Berlin has created a sensation in political circles, as it is interpreted as being a confirmation of the recent indications that the relations between Germany and Austria are less friendly than they have been. His majesty's avoidance of Berlin is supposed to be due to his displeasure at the abandonment of the projected festal reception. The authorities of Potsdam, however, are preparing to give the emperor and empress a brilliant welcome on their return to their home there.

DWIGHT'S RESIGNATION. Speculation as to Why He Betired a

President of Yale University. NEW HAVEN, Nov. 19.—The resignstion of President Timothy Dwight of Yale university was totally unexpected in this city, and at first thought Yale men are a little inclined to believe that

there is something behind it all.

Those in close touch with the university remember that less than a year ago President Dwight proposed the most radical innovations ever embodied in a Yale president's annual report. They included requests for donations amounting to \$3,000,000 for the erection of new buildings to be completed in time for Yale's bicentennial in 1901. It was reported from sources of high authority that at least \$1,000,000 had been pledged conditionally for the new buildings and that the bicentennial committee was meeting with great success in its efforts

to obtain the entire amount. The scheme of the bicentennial celebration was President Dwight's, and his retirement from the presidency before the bicentennial has aroused a suspicion that he has differed from the corporation, the governing body of the university, on some important matter. Neither President Dwight nor any member of the corporation will, however, admit that there has been a strain in the university management over the plans for the bicentennial.

That President Dwight's determination to resign was sudden is shown by the fact that he had leave of absence two years ago. He spent a year in Europe with his son Winthrop, returning a year ago and reassuming his presidential duties. Had he contemplated resigning at all, he would have done so at that time, instead of taking a year's rest to fit him for another term as Yale's executive head.

At present Yale men are discussing the most effective means for inducing President Dwight to withdraw his resignation instead of talking of his probable successor.

Pressure will be brought to bear upon him to persuade him to remain in office when his resignation comes up for final disposition before the special committee of the Yale corporation on Dec. 15.

Although no member of the faculty is looked upon as a leading candidate to succeed President Dwight, Professor Edward S. Dana would have the support of many of the alumni. If a new Yale president is chosen from outside Yale, a Yale graduate who is president of some smaller college may be chosen. It has been suggested that Franklin Carter, president of Williams, fills these requirements and would make an ideal

A RUNAWAY STEAMER. British Navy.

QUEENSTOWN, Nov. 19.—Something in the nature of a sensation has been caused here by the extraordinary conuct of Captain Johnson, commander of the British steamer Briardene, which strived here on Oct. 21 from New York extensively damaged by severe weather, during which she was almost submerged for ten days. Since that time the Briardene has been repairing for a passage west. The Briardene was seized yesterday morning by a marshal of the admiralty court for debt, and a balliff was placed on board of her. The captain determined to defy the court and started for Delaware Breakwater, but the pilot, who was aboard, refused to navigate the ship out of the harbor, with the result that the captain attempted to do so and grounded the Briardene off Haul Bowline. Two hours later she was floated off.

In the meanwhile the admiralty court officials communicated with the admiral in charge of this station, and the latter sent a steam pinnace to intercept the Briardene. The pinnace met the Briardene as the latter was passing out of Queenstown harbor at full speed and ordered her to stop. The captain of the steamer paid no attention to the summons, but continued on his way to sea as fast as the engines of the Briardene could drive her, with the little pinnace following in pursuit. The chase was watched by excited crowds ashore. Off Spike island the Briardene had completely outdistanced the pinnace, and the latter gave up the pursuit.

TWENTY-EIGHT DEAD

British Bark Atlanta Lost Off Oregon Coast.

ONLY THREE OF HER CREW SAVED.

Ship Steered Out of Her Course and Ran on Rocks, Where She Was Pounded to Flores Beyond Beach of Assistance.

FORTLAND, Or., Nov. 19,-A special to The Oregonian from Yaquina, Or., BAYS:

"The British ship Atlanta, Captain Charles McBride, from Tacoma to South Africa with wheat, was wrecked off Alsea Bay, 16 miles south of Yaquina Bay, yesterday morning. She carried a crew of 27 men, and all were drowned but three.

"The ship's masts have been blown away, the decks swept clean, and the vessel has broken in two amidships. The Atlanta sailed from Tacoma last Saturday with a cargo of 1,863 tons of wheat for Cape Town, and her skipper had made a wager with the masters of the ships Earl of Dalhousie and Inborhorne in a race to the Cape of Good Hope. The logbook at the life saving station shows that Thursday morning between midnight and 6 o'clock the Cape Foulweather lighthouse was concealed by fog and heavy sheets of rain. The Atlanta was sailing at a high speed Thursday, when she went on the bar. A few rocks in the trough of the waves, attended by a heavy settling on the bottom, caused her timbers to give before the men could reach the hatchway. The jar of running on snapped the masts off as though they had been matches. The masts and rigging went over the side in a tangled mass like a forest before a gale. The breakers swept the afterdecks and pounded in the cabins. Those who escaped were on deck at the moment of the crash and began to launch a lifeboat. While they were working with the davits a wave passed over the ship, tore the lifeboat loose and set it afloat. It was full of water, and the oars were gone. Several were in the boat at the time of its release. All but two were washed overboard from struggling and dying companions. These two picked up a third, then in the surf. For three hours or more they were buffeted about until the storm washed them upon dry land. One of the survivors stated that the captain steered close in to Cape Foulweather and, not seeing the lighthouse, supposed the vessel to be some distance from shore. This caused him to continue the southeast tack too

REBELS HOLD PANAY. Whole Island Ontside of Iloilo la

WASHINGTON, Nov. 19.-News of a mixed character came to the navy de- ! partment yesterday from Admiral Dewey touching the situation in the Philippines. The admiral sent two of his warships, the Charleston and the Concord, some time ago to the southward from Maniia to ascertain whether there was truth in the reports that the insurgents have extended their activities in that direction. Yesterday he cabled as follows:

Insurgent Hands.

"Charleston and Concord arrived from Iloilo. Glass reports that the entire island of Panay is in possession of insurgents except Iloilo, which is defended by 800 Spanish troops. All foreign citizens there beg for American protection. The island of Negros has declared independence and desires American protectorate." Glass is the commander of the

Charleston. So far nothing has been done by the administration toward curbing the insurgents in their operations save verbal representations from the American commanders to Aguinaldo, in which it has been pointed out to him that it would be good policy, in view of the probability of the annexation of the islands to the United States, to pursue a course that would not be obnoxious to the United States. But the situation is now realized to be critical. So far as the Spaniards are concerned, perhaps they can be left to take care of themselves, but the foreign residents at Hoilo are differently regarded. The difficulty in the situation is that with the best intentions to intervene to protect the Europeans and other foreigners and to save the city of Iloilo, the second in importance in the Philippine group, from looting the United States forces appear to be estopped under the rules of war from moving from their positions. Such is the construction placed upon the clause in the protocol relating to a suspension of hostilities.

The immediate effect of this state of affairs may be to hasten action in the Paris conference, for it is only by the termination of that tribunal that the United States can come to the relief of the beleaguered Spaniards at Iloilo and at other points.

It is said to be a fact, however, that a total disagreement at Paris may result in speedier action than if the commissioners agreed upon the main principles of the Philippine cession, for in such case several additional sessions probably would be required in order to arrange the details of the treaty.

It is now thought to be certain that the commission at a meeting next Monday or Tuesday will do one of two things-i. e., either agree to the cession of the Philippines or note a disagreement and dissolve the meeting, for the administration is not disposed to toler. ate further delay and has so instructed the United States commissioners. The latter sent a long cablegram yesterday in cipher. The deciphering occupied the entire official day, and meantime there were wild rumors touching the nature of its contents. As a matter of fact, it was nothing more than an extremely verbose statement of the Spanish side of the case relating to the Philippines. There was a renewal of the attempt to

thing forms with the American conten-

tion as to the meaning of the proto clause relative to the disposition of t Philippines and much quibbling, accou panied by quotations from French Bpanish and other European language in the effort to demonstrate to Ame icans just what an English word mist mean. The latter will take no notice this kind of hair splitting plea, but to-day's meeting will call on the Spanish commissioners to make enswer the American proposition to cede ti Philippines, probably allowing uni Monday or Tuesday only for a final and tesponsive answer on that point.

DUN'S REVIEW.

Fallures For the Week Forty-three Less Than Last Year,

NEW YORK, Nov. 19.-R. G. Dun 🏝 Co.'s weekly review of trade says: The situation is clearer, and the improvement in business which was pected after the election has beguin. Payments through clearing houses are far the largest ever known, for the week 37.3 per cent larger than last year and 33 per cent larger than in 1892, and for the month the daily average had been \$254,422,000, 20.7 per cent large. than last year and 18.9 per cent large than in 1892. Stocks have advance steadily in the face of heavy realished by European holders and domestic speculators, rising an average of cents for the week, though trugition

slightly declined. It is noteworthy that in spite of all. changes the price of spot wheat has big slightly changed: The exports for the week, flour included, have been 3,968,7 bushels from Atlantic ports, again \$2,237,344 last year, and from Pactaports 988,093 bushels, against 2,151,344 last year making in all for two weal last year, making in all for two wee of November 9,312,331 bushels, against 9.939.804 last year.

Such returns leave wide room for conjecture as to the influences governing the price, but with 10,337,311 bushels ceived at western points during the week and in two weeks 20,261,356 bushels against 15.228,167 last year it can be longer be said that western suppl threaten to run short. Corn exports so exceed last year's, amounting for the week to 2,993,720 bushels against 2,724-457 last year, and for two weeks of November have been 5.056,051 again, 7,197,098 last year. Such shipments all er the middle of November go far to warrant the belief that the foreign 🏚 mand for this grain is destined to be greater than has been expected,

Failures for the week have been 228 in the United States against 267 last year, and 26 in Canada against 32 last.

DISCHUER IN FURIO RICU.

Cabinet Considers Reports That Anarchy Prevails In the Island, WASHINGTON, Nov. 19.-The cabinets

session yesterday was devoted largely to consideration of complaints that pave reached the war department aftering that a state of practical anarchy prevails in Porto Rico.

These complaints assert that the lawless element in Porto Rico are committing depredations of the gravest climeacter and that the seriousness of thesituation is increas the fact that United States troops stationed in the island likewise have been guilty of misconduct.

Secretary Alger, at the instance of the president, has cabled to General Brooke, inquiring as to the accuracy of the complaints,

The most serious allegations are against brigands and lawless elements in the smaller towns away from the coast. It is stated that, taking advantage of the unsettled state of the country due to the transfer of the government from Spain to the United States. bands of men have organized for robbery and rapine, burning houses and plantations and levying tribute upon the people wherever possible. In onecase it is said that they made a raid on a small town of about 1,500 inhabitants 15 miles from the nearest troops and burned and destroyed property to a considerable value. INVENTOR OF THE KEELEY MOTOR.

Thought He Had Discovered the Secret of Perpetual Motion and Squandered Large Sums of Money on His Wild Scheme.

PHILADELPHIA, Nov. 19.-John W. Meeley, the inventor of the Keeley moor, died last night at his home in this ety from pneumonia. He was taken in on Saturday last and continued to grow steadily worse until his death. Mr. Keeley was 61 years of age and **leav**es a widow.

He was a native of this city. His edecation was meager, and at an early age he became a carpenter, following that trade until 1872. It was in that gear that he announced his discovery of a new force by which motive power would be revolutionized. Following this. be constructed what has become known the Keeley motor. On Nov. 10, 1374, he gave its first public exhibition before s number of capitalists and scientists, ★ho advanced \$100,000 to enable him to perfect his discovery and apply the principle. Since then large sums of money have been expended on experiments without any practical public requits. Between 1874 and 1891 Keeley onstructed and discarded 129 differint models. In his first models he em**loyed water as a generator, but later** he experiments were made with what 🌬 called a "liberator," a machine cruipped with a large number of tun-ing forks, which, he claimed, disinregrated the air and released a powerful

First Pension From Spanish War. WASHINGTON, Nov. 19 .- Commis-Moner Evans of the pension office notified Secretary Alger yesterday that Jesse T. Gates of the Second United States artillery, who lost part of his up-per lip in the West Indian campaign, has been awarded the first pension on account of the Spanish war. Gates will receive \$17 per month, and this being inadequate a private pension bill increasing the pension will probably be introduced in congress. Claims on account the Spanish war are now coming in rapidly. The total on file up to date is 1,947 for war service and 178 for naval service, exclusive of the claims of the battleship Maine victims.

The Dreyfus Case.

PARIS, Nov. 19.—There was a noisy meene in the chamber of deputies yesterday during M. Big Store, No. 35 North Street. NOW TO BUSINESS.

Election is over and Thanksgiving is close at hand, and in the near distance see the glow of the Christmas candles. The climax of one year of usefulness to give piunacle of your patronage to us comes in the next five weeks.

We are ready. It is the complete and perfect readiness that comes of a year's preparation for two months' business. You will not realize the magnitude of these preparations, even if you try to do so. There never was such a Christmas store in Middietown as this will be. But that is for another time. Each event in its place. We are at present marking down prices to clean out a lot of goods to make room for our great display of Holiday Goods that are arriving every day by the truckload.

High Grade Linens for Dining | Men's Underwear and Half Hose. Table and Bath Room.

But the Spaniards kept us busy, when we were nor busy on our own account g tring ready for the big fight. That I was a counter of the Roosevelt Regiment 1 shall always be proud, and the fight- at Las Qua-imas

and at Son Juan Hill will be things to talk about for many a year. But I would not have lived to talk about them it I had not sound something to brace my nerves up again after the siege I had of it at Santiago with dysentery and slow hever. I got so I could hardly shoot, and felt like I did not care whether I did or not.

Host 20 pounds in weight and a los more than that in spirit, it you can measure a fellow's spirit that way. Hall a dozen Mauser bullets could not have made a worse mess of me than the Cuban climate and the mud in the Santiago trenches did. As soon as I found: I was sick and my nerves were all gave I hunted for a tonic. Earler in he, however, I had lived in the East, and after a month in service knew that what I needed, in my ceneral ran-down comicion, was a perve tonic. I knew it my nerves were fixed up there would be no treable about my general hearth as soon as I got away from the army.

I also knew the position that Prine's celery compound occupied, although I had not had occasion to use it is uch myself. I got a lew bottles of it and began to take it and give it to a lew of my nequaintances.

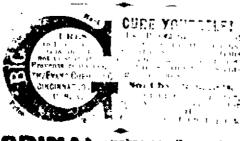

It actually seemed to build up my nervous constitution almost as rapidly as the Southern chunte had forn it down. The same thing was true of the other men I gave it to.

Unless I had found this tonic to restore my nerves I led sure that I would have gone to the hospital at Monrauk Point, many other poor fellows whese impoverished condition did not yield to the

Messrs, Wells, Richardson & Co.,

Gentlemen-Nobody can blame me of being disloyal if I say that Paine's celery compound has done more for me than any other person or thing since Heft Silver City to join the Rough Riders.

It has pulled together the scraps of a stalwart man brought me around from the bard effects of the Cuban climate, and braced me up until I am in better bealth than I have been in the years. My friends in the West think that I am nearly dead from the army lever they called callentura in Cuba. When I get back to Silver City they will be as surprised as I sometimes feel myself. I had pretty good to tyes before I culisted. They went to pieces when we were ying in the trenches at Santiago, dodging bullets. I began to beel feverish from the day we got to Stroney. When the Mausers sang about our ears I noticed that I was getting

I found myselt scarcely able to walk after the battle of San Juan.

I got worse until I got back to Moninuk Point, when I got a bottle of Paine's celery compound from another fellow in the regiment. I saw several of the Rough Riders taking it.

With some of them, as with me, it seemed to take the place of both food and medicine, for the systems of many of the men needed toking up before they could again eat as they had done before they left this country.

I don't know much about medicines, We don't need much medicine, in New Mexico. But I know Paine's eclery compound has fixed me up until I feel able to take the road for home, where I expect to tell every one who mentions nerves to me about my case.

Gen. Merriam, commanding the Department of California, has reported to the War Department that his reports from Honolulu, under date of Nov. 9th. showed 292 cases in hospital there. Of these sixty five were typhoid and forty malarial fever.

John Brisbin Walker proposes to organize "The New Democracy" in New York city in order to overthrow Tammany. Mr. Walker has undertaken a most herculean task and one that a man more versed in politics would not have dreamed of attempting.

Isaac W. Turner, the Democratic candidate for Member of Assembly in the Third Westchester district, spent \$2,-630 and was defeated after all. His certificate of expenses shows him to be possessed of both humor and philosophy which would have relieved the tedium of the legislature's proceedings, and his defeat is therefore a minor public calamity. Mr. Turner gives the items of his lavish expenditure with refreshing frankues and among them includes \$450 given to churches, lodges and hose companies, and contributed "for cleaning up cemeteries and reducing debts on many institutions good, bad and indifferent." He coneludes his expense account with this: "Shy, but unable to itemize \$175," an eminibus statement which like charity probably covers a multitude of sins.

The figures of the official canvass of Orange county's vote, which are published elsewhere, show some interesting Republican and Democratic caudidates for other State offices or for the Republifor by the fact that only 232 of the 408 Prohibitionists, in the county voted for their candidate for Governor. These recalcitrant Prohibitionists seem to have divided their votes about evenly between Roosevelt and Van Wyck for Roosevelt's plurality is about the same as that of Other candidates on the State ticket. The Socialist-Labor voters, about 108 in all, did not "slosh around" while in the voting booths, for the vote for all their candidates is practically the same. This vote bas fallen very materially from last year when 223 votes were poiled. The I robibitionists, with an average vote of 408, did better than last year, when they only polled 373 votes for their candidate for Judge of the Court of Appeals.

BY ABSOCIATED PRESS.

NEW YORK, Nov. 19.-Fire, which broke out in the ship yards of John H. Starin, at West New Brighton, Staten Island, early to-day, burned seven frame buildings and their contents, causing damage estimated at \$400,000.

The burned buildings include the machine shop, boiler shop, carpenter shop. main office and three small repair shops. Four immense dry docks of the company, each worth about \$150,000, were saved. The Starin officials estimate that the machinery in the machine shop alone was worth \$200,000, while that in the boiler shop was worth over \$100,000. The fire will cause a shut-down of the plant and will temporarily throw several hundred men out of work.

soldiers Wounded. BY ASSOCIATED PRESS.

Manila, Nov. 19 .- It is reported that Iloilo, the capital of the island of Panay, is in the hands of the insurgents. The U. S. cruiser Charleston and gunboat Concord have gone there.

Three Filipinos last night hired a carriage and afterwards became engaged in a dispute with the driver regarding the fare. Some members of the American military police attempted to arrest the natives, but the latter resisted and Sergeant Price of a Minnesota regiment was stabled and killed and three other American soldiers Maher, Montgomery and Hoyt wounded. Maher shot one native

dead and the others were arrested. The Spanish gunboate Isla de Cuba and Isla de Luzon, sunk during the battle of Manila, have been refloated and docked at Cavite.

Richard P. Tappan died at his home, 175 North street, at 1:80 o'clock, Friday afternoon, aged seventy-seven years and seven months. He had been suffering for some time with right's disease.

He was born at Woodbourne, Sullivan county, and was a farmer until five years ago when he came to this city. He was the eldest of a family of six children, who have all gone before him. He is survived by a wife and six children, two by a former marriage, Mary McMichael and James, in Michigan, and four in this city, Elsie, wife of Henry Sengstacken; Minnie, Edith and Lizzie at home.

Short services will be held at the house, to-night, at 8 o'clock. The body will be taken to South Fallsburgh on the O. and W. milk train, to-morrow morning, and the funeral will be held in the church there at 10:30. Interment in the Fallsburgh Cemetery, in the family plot.

Jacob Ter Bush

Jacob Ter Bush, the well known hotel keeper, of Pine Bush, died at 7.30, Friday, of paralysis, aged 73 years.

"Jake" Bush, as he was familiarly known, had a wide experience in life. He was widely known in Orange county as a hotel man, and as a popular attendant on horse races, fairs and other functions which drew the greatest crowds in this eounty.

He began life on the D. & H. canal, being bern at Kerhonkson, a son of William T. and Rachel Bush. For thirty the star, and is quite popular in this city | years he was thus engaged, the sharer of his active life's work being Jennie Ward, whom he married at Stone Ridge, Ulster county. His boat was a Jesse Johnson 11.759 f.eighter "Little Eve."

After leaving Kerhonkson, Mr. Bush engaged in the hotel business at Centerville, Highland, Gardiner's Station and Eller ville, Ulater county, and then came to this city, where he took the Robert Berry place, now Foster's grocery. He was in the latter location a year, when he bought out Jonas Lefever, who was doing business in the place now conducted by John Farrell. Later, he went into the place then conducted by John Thompson, and now by Black, on James street. At the same time he conducted this latter place, he also had a place at Tri-States.

He gave up both of these places twenty-two years ago, and went to New Hampton where he ran the Talmadge House for forteen years. From there he went to Pine Bush, where for eight years he was the popular landlord of the Taylor House, and in this hotel be died.

He is survived by one son, Stephen D., whose home is at 69 West Main street, but who is employed at Milburn, N. J., and a daughter, Lillian, wife of Cheuncey Rebertson, of Walden. The following brothers and sisters survive: Mrs. Egbert Mack, of Creek Locks; Mrs. Predie Addis, of Kerhonkson, and B. B. Ter Bush, of Eddyville,

The funeral will be held Tuesday, at 10 a.m., at his late home, and burial will be at Phillipsburgh. The casket will be opened there for triends who care to take a last look at the remains.

CIND.

From the Goshen Independent.

The decision of the Goshen golfers to unite with those of Middletown and arrange for links along the line of the trolley road near Midway Park is eminently wise. The cost of securing ground suitable for golf links and of maintaining the same in good order is by no means inconsiderable, while the in which to indulge in the fascinating game is not large. Much better results from the two places rather than by a comparatively weak organization in fad. The establishment of links near Goshen would be of material benefit in bringing hither a large number of summer boarders who are looking for a place to epend their annual onling where the

#### THREE IN ONE DAY.

Victims of Accident Buried in the Grahamsville Cometery. From the Ellenville Journal.

A very uncommon occurence is the burial in a rural cemetery of three persons in a single day, all victims of death number of people who have the leisure | by accident. In the cemetery at Grahamsville, on Wednesday, were buried the following: Little Earl can unquestionably be secured by the Dierfelter, killed by falling from a wagen; formation of one strong organization Adam Dulaff, an elderly man living en Red Hill, between Bull Run and Denning, who went out into his woods, on Monboth. Just at the present time golf is a day, to chop some wood, and when after some hours his people weut to look for him, was found crushed to death under a tree, which had fallen upon him. Another was Fred. Koons, son of the late Samuel Koons, of Eureka, who was drowned in Sprague Brook.

#### Before and after.

Private Clem Atkins received a letter Friday, from Capt. A. E. McIntyre, enclosing a picture which the latter took of Atkins as he was sailing for home. The picture does not look much like the stout and seemingly healthy soldier who is familiar to Middletowners.

WINTER FLANNELS FOR CO. L.

Bring Them to the Armory, Wonday Afternoon, When the Box Will Re Packed.

Friends of members of Co. I, who wish to send winter flannels to San Francisco, to be in readiness there for the soldiers when they land from the transport, should bring or send their packages to the armory before 6 o'clock, Monday afternoon. Each package should be done up in paper, tied with twine and marked with the name of the soldier for whom it is intended. Each person bringing a package will be expected to pay fifteen cents as their share of the transportation charge. The parcels will be packed in a large box and sent to San Francisco by Wells-Fargo Express.

Alderman Lawrence has written to a friend, Ed. Atwell, of San Francisco, a former resident of this city, who has shown a most kindly interest in Middletown's soldiers, asking him to see that the box and its contents are in readiness for the soldiers when they reach San Francisco, and there is no doubt that Mr. Atwell will arrange for the prompt delivery of the parcels which will afford so much comfort to the sol-

The Republic Has Vast Possessions

FRE CH EXPANSION.

in the Dark Continent. its Desire to Connect the Eastern and Western Colonies Has Led to

the Fashoda Affair and Aroused

British Jealousy.

There is much more at stake in the Anglo-French controversy over the ownership of the territory around Fashoda than that territory itself. The controversy has reached the danger point because there have been constant clashes between the two nations during their work of seizing the dark continent and opening it to civilization. In the struggle for African territory France has been England's greatest rival To-day Great Britain controls 2,572,900 square miles of African soil exclusive of Egypt, while France controis 2,999,630 square miles.

These figures show, says the Chicago Times-Herald, that the French own the greater share of the territory. Yet that owned by England is more populous, having 40,436,500 inhabitants within its borders, against 27,099.000 in the French possessions. The possessions of England are not only more thickly settled, but they are also more valuable. The Sahara desert counts for 1,550,000 square miles in the French estimate, and, as is well known, a great proportion of it is absolutely useless for any purpose, as is shown by the fact that its population is less than one individual to each square mile.

Algeria, the principal colony of France, though by no means the largest, is practically a part of the republic itself. The Algerians send three senators and six deputies to the French parliament, and these, unlike our territorial delegates, have a right to vote. The chamber passes laws for Algeria except on the most local subjects. Algeria has an area of 257,600 square miles, including its "hinterland," and a population of 4,000,000.

Tunis, which came under French control in 1881, is the most important

MAJ J B MARCHAND. (The Officer Who Led the French Advance on Fashoda)

foreign possession that is administered by the French minister of colonies. It has an area of 94,800 square miles and population of 1,500,000.

Madagascar and its dependencies are a recent prize. Originally a french protectorate, the republic gobbled in the whole of the island. The Hova dynasty made concessions which gradually ended in its dethronement by the French. England laid claim to the island, but did not plish it, and French influence there is now unchallenged. August 6, 1896, the island was declared a French colony. Madagascar has an area of 228,000 square inites and a

population of 3 520,000. With the exception of the British colonies of Gambia, Sierra Leone and the Gold Const. Portuguese Guinea and Liberia, France claims the whole of West Africa from Cape Blanco to Tongo land and in; and to the Upper and Middle Niger and considerable areas to the east of the Upper Niger, including the kingdom of kong and neighboring territories. By the Aug'o-French treaty of August 5, 1590, Great Britain recognizes as within the French sphere of influence the whole region to the south of Tunis and Algeria north of a line from Say on the Middle Niger to Barrawa on Lake Chad, including all the territories which belong to sokoto. The line of division between England and France has not been settled and war has been threatened before on this account. The total area claimed by France in West Africa is about 550,960 square miles, and it is divided into Senegal, Riviere du Sud, the Gold Coast, Prench Sudan, Dahomey and French

French Congo and Gaun region is a continuous and connected territory on the right bank of the Congo It has a total area of 300,000 square miles, and the native population is estimated at 5,000,000, with but 300 Europeans in the district.

Diego Suarez Nossi Be and Ste, Marie were placed under the authority of the resident general of Madagascar after the annexation of the island

Reunion, which has belonged to France since 1764, is represented in the French parliament. It has an area of 965 square nules and a population of 167,000 The government of Mayotte and the Comoro island, which together are about as large as Reunion, were in 1896 attached to the latter island.

On the east coast are Obock and the Somali Coast protectorate, with an area of 46 220 square miles and a population of 200 000. It is France's enneavor to connect this with the French Congo and West Africa that has led to the Fashodi affair.

NEW PRENCH PREMIER.

Charles Alexandre Dapay Once More at the Blead of Government Affaire to France.

Charles Alexandre Dupuy, the head of the new ministry of France, is not new to the office of premier and minister of the interior-the two being masociated together in the Freuch cabinet. M. Ribot, who has just declined to build a new structure on the Brisson wreckage, was succeeded as premier in 1893 by Dupuy, who held the office until the early part of 1895, when he retired with high honors. He stands so high in the estimation of political Frenchmen that his candidacy for the presidency of the republic was looked upon with great favor. M. Dupuy is 47 years old. His people were poor and

(Head of the New Ministry of the Repub-lic of France.)

held humble positions. His father was a minor official in the local perfecture.

The early career of the now states man was given to teaching of philosophy in colleges at Nantua and Aurillac, and also at various lycees. He gave great attention to the cause of popular education, and in 1880 became school inspector at Mende, and later inspector at Caen and Ajaccio. At the latter place he was in due time chosen as vice rector of the Corsican college. In 1885 be entered the national political field of France, being returned to the chamber of deputies as opportunist repubhean member for the Haute-Loire. After entering parliament be championed primary education for the people, and in 1886 brought forward a proposal to transfer the nomination of schoolmasters from the hands of the prefects of departments to the rectors of academies But the storm of opposition raised was so great be withdrew his proposal. The elections of 1889 found him more in favor with the people than he had ever been before. His majority over his monarchist opponent was a phenomenally large one Three years later he took office under the then ministry of M Ribot and succeeded him six months later. He is a man of broad mind and great physical courage. This latter quality was marked at the time of the bomb explosion in the chambers, when he displayed no fear. He ceased to be premier in 1895, and was succeeded by M. Ribot, who now declined to act again

Cardinal Vaughan is the accredited representative of the church at the court of St. James, and is a close personal friend and adviser of Pope Leo XIII Of late there has been a constant stream of correspondence between his holiness and the cardin I, and it is said that during the pope's most feeble days

his business is given entirely into the

charge of Cardinal Rampolla secretary to Leo XIII., and Cardinal Vaughan. Cardinal Vaughan has made an exhaustive study of the religious question in the Philippines, and is undoubtedly the greatest diplomat in the church. He is called the "dean of the diplomatic corps." He devotes a great portion of his time to the organization of charitable institutions and the other part he spends in writing. The throne room of the cardinal is in Westminster palace, and just across the hall is the library where the brilliant productions of the vatican's pen and their birth Cardinal Vaughan takes next rank to the pope

THE LAMBETH TOMB.

It Has a Prominent Place in the History of Kentucky.

Marks the Last Resting Place of the First Victim of the Code Duello in die Bisegraas State — 🛦 Tragic Encounter.

An old wooden bridge which spans the Beech Fork river about a mile southwest of Bardstown, Ky., is pointed out as the scene of the first duel ever fought in Kentucky.

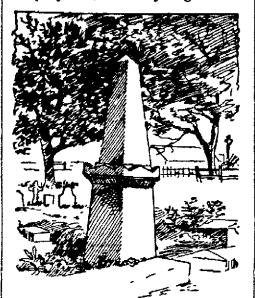

In the early part of the present century two young men, Edward Lambeth, of Jefferson county, and James Sturgls, of Alabama, camé to Bardstown on a visit. They were fast friends, of splendid families and possessed of ample

One of the wealthiest merchants engaged in business there at that time was James Allen. He was a man of advanced years, of inflexible courage and strong convictions. He was a son of John Allen, a brave soldier who was killed in the disastrous battle of the River Raisin, in the war of 1812, and for whom the county of Allen, this state,

Young Lambeth spent much of his time in Lambeth's store, Mr. Allen having taken quite a fancy to him. One day the former, having occasion to make a payment, took from a secretary drawer in a back room of the store a large roll of notes, from which he selected the required sum. He then counted the remainder and replaced it in the drawer, which he neglected to

Lambeth was the only person in the room at the time. Later in the day Allen, on recounting his cash, found a \$10 note missing. He suspected young Lambeth and circulated it over town that the young man was a thief. As soon as the latter became apprised of this he determined to secure a retraction from Allen or else kill him, and he talked a great deal to that effect.

Calling his friend Sturgis to accompany him, the two young men set

LAMBETH'S TOMB. (It Marks the Scene of the First Duel Fought in Kentucky.)

out one morning to intercept Allen as home. They met at one end of the old bridge. Allen had heard of the threats that had been made against him and was prepared for any emer-

Lambeth immediately demanded retraction from Allen.

"Young man, if that is what you are after," coolly replied Allen, as he dismounted from his horse and placed it between the two young men and himself, "just wait a moment," and with blank at Lambeth. The latter immediately returned the fire and then fell back in the throes of death. Allen escaped unharmed, for it was afterward found that Lambeth had, in his haste, neglected to put a ball in his pistol. Lambeth fell upon a rock close by and his life blood, gushing out in a great torrent, deeply dyed the surface of it. A greenish brown discoloration on the stone, which is plainly visible to this day, is said to be the blood of the murdered man. The stain is more than ordinarily bright after a

Some months after the affray Allen had occasion to remove the old secretary wherein he kept his valuables and behind it, in the wall, was a rat hole. A piece of peculiar-looking paper protruding from this hole attracted his attention, and an investigation proved it to be the missing bank note. Upon this discovery Allen became deeply conscience smitten and his death followed a few years afterward.

Lambeth's body rests in the old pioneer cemetery at Bardstown and his grave is marked by a marble shaft, upon which is recorded the fact that he fell in the first duel ever fought within the precincts of Kentucky.

The Power of Coal. An interesting calculation has been made, which shows that the energy produced by a pound of good coal equals the work of one man for one day. One square mile of a seam of coal only four feet deep could therefore be made to exceed the work of 1,000,-000 men for 20 years.

World's Largest Library.

The largest library in the world is that of Paris. It contains upward of 2,000,000 printed books and 160,000 manuscripts. The British museum contains about 1,500,000 volumes and the Imperial library at St. Petersburg about the same number. These are the largest libraries in the world.

Birds and Their Claws. The reason given that birds do not fall off their perch is because they cannot open the foot when the leg is bent. Thus a hen while walking will close its toes as it raises the foot and open them as it touches the ground.

ON THE TIP OF THE TONGUE.

A well known resident of East avenue was awakened about 3 a. m., Thursday morning, by a knocking at his front door. Going to the window he called

"What's wanted?"

And he nearly leaped out of the window when he he ard:

"Say, mister? Jus' soon come down give feller somethin' i'eat?"

A couple of old members-charter members-of the Bachetors' Social Clup became reminiscent a night or two ago. The talk sterted over the remark that Wanamaker's music no longer holds forth at the glub hops, and that one of aforementioned members had recently heard genial old Fred say, as he quaffed his beer at intermission:

"Great heavens! I even buy my own

Said one of the speakers:

"The Bachelors' Club of to-day is not the Bachelors' Club of twenty years ago. Then it cost the boys in the club five or six dollars for every hop and we let outsiders in at two dollars a head. One night ninety outsiders paid two dollass each. I remember, too, that on Mn ch 4, 1872, we gave a dance in 8 won's field, now the Free Christian Courch, at which Wanamaker's orchestra. or reared with twenty-five pieces, and for which we paid \$350. During the so vouteen years when 'Yauk' Roberteon was treasurer, the club paid Wanamaker over \$13,000.

"We used to give awell affairs, I tell you. Lots of people came up from New York. 'Mel' Horton used to bring them up. 'Joe' Weller, of Tefft, Weller & Co., was a frequent attendant, and one night George Gould was with us. Those fellows were always good for \$20 each around the hotels.

"In those days the Beakes and Horton families were great helps. They used to send large delegations."

"Yes, those were great days," said the other member. "And do you remember how we used to get the girls there? There was no monkeying around as their is nowadays to get the swellest girls on the list as often as possible, while less popular girls wait nutil the good-hearted fellows hunt them out-none of that. We used to send big sleighs around after them. They came in loads and they were all huddled in together. In those days no girls had the appearance of wall flowers. The members denced with them all and when it was time to go home they were sent back the same way they came. Decollete dresses were unheard of at those dances. I remember that a Unionville widow attended one time, displaying as decollete gowns display, and all the boys danced with her, and how mad the other women got. The girls were very strict those days. Drinks in a restaurant and rides home in closed coaches with escorts didn't go."

Liberty Street school to Be Roopened Monday, Nov. 28th.

The Liberty street school will not be reopened until Monday, Nov. 28th. A reopening of the school next week, as proposed by the Board of Education, would give but three days before the Thanksgiving vacation, and in view of this the health authorities thought it just as well to defer the opening until the following week.
